DETAILED ACTION

1. Claims 1-4, 6-11, 13-23, and 25-31 were pending in the instant application at the time of the issuance of the previous Office Action, mailed September 18, 2007. Via the latest response from the Applicant, filed December 11, 2007, claims 2, 4, 13, and 21 are cancelled. Therefore, claims 1, 3, 6-11, 14-20, 22, and 25-31 are pending and have been examined.

Allowable Subject Matter

2. Claims 1, 3, 6-11, 14-20, 22, and 25-31 are allowed.

3. The following is an examiner's statement of reasons for allowance:

The closest prior art in the field does not teach the combination of features of the claimed invention as set forth in the independent claims, particularly including:

As per claims 1, 20, and 29, dynamically generating an authentication user interface based on a HTTP request and configuration properties defined by a first plug-in module, where dynamically generating the authentication user interface comprises: selecting a first web page template from a plurality of web page templates based on user credential information and the configuration properties;

As per claim 10, dynamically generating a first web based GUI based on a HTTP request and configuration properties defined by a plug-in module, where dynamically generating the first web based GUI further comprises: detecting a client type of a browser; and configuring the first web based GUI to be supportable by the client type; requesting additional credential information from a user; and dynamically generating a second web based GUI based on the additional credential information and the configuration properties.

As for claim 17, a web based user interface module for receiving an HTTP request over a network and dynamically generating a first user interface based on the HTTP request and configuration properties of a selected plug-in module; a plurality of plug-in modules coupled to the web based user interface module, each of the plurality of plug-in modules providing web services; and a model module coupled to the web based user interface module and the plurality of plug-in modules, the model module for selecting the selected plug-in module based on the HTTP request and for providing an interface between the web based user interface module and the plurality of plug-in modules.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
